三次元自動選料振動研磨機(VB-A型)

3-DIMENSIONAL VIBRATORY FINISHING MACHINE

特點 PURPOSE

本機適用於易受變形或打擊痕等工作物，磨光或選料作業，本機臺上端周圍有漩渦狀傾斜通路，工作物與研磨石的混合物在選料作業中呈螺旋狀往前流動至選料區。因此，雖然在處理易變形或打擊痕的工作物時，其工作物本身亦不受損傷。選料區設有轉換開閘門、過濾網等可把磨物與被研磨物分離，易於選料，操作簡單。

This machine is designed for polishing and screening workpieces that easily deform or dent. On the top of this machine is a turbine access via which materials and polish move forward to the screening section (this process will not damage materials). The screening section has a switch gate and filter screen where grinding stones and workpieces are separated for easy operation.

VB-A型

三次元振動研磨機(VB-B型)

3-DIMENSIONAL VIBRATORY FINISHING MACHINE WITH AUTO SELECTOR GEAR DRIVEN AUTO SELECTOR.

特點 PURPOSE

本機臺之振動幅度及翻轉力較強，切削力高。適用於各種金屬、塑膠等之表面磨光、倒角、去除毛邊、除銹、粗磨光、精密磨光、光澤打光等作業。

This machine has stronger vibration and turning on work piece, higher sharpening. Suitable for deburring, polishing, grinding, brightening, cleaning, scale removal and flash removal of any kinds of metallic, plastic, ceramics and wooden materials.

VB-B型

機種 (Model)	容量 (Volume)	重量(kg) (Weight)	馬力(HP) (Moter)	功率(kw) (Watt)	機臺尺寸 (Width)	充填量(kg) (Fill Volume)
VB-25L	25	58	0.5	0.37	570×670H	100
VB-50L	50	260	1	0.75	696×850H	150
